Important Points:

No advertising messages, texts or pictures. If these specifications are not adhered to, a perfect representation is not guaranteed. The background image or the coloring of the background is there to support the Brandday in color, but not to transport information. Depending on the browser size, the background is no longer fully visible. It is not technically feasible to always keep the background visible. We recommend integrating important messages into the advertising media. The desired background color must be supplied as hex code. (Ex: # CB0D33)

20 Minuten: the ad is placed 31px below the top of the screen.
